- Elasticsearch
- Relational Database Management

Technical Writing and Formatting to create instruction manuals
Adobe Creative Cloud to format video clips and photos
Microsoft Office Suite, Trello Software

**PROFESSIONAL EXPERIENCE:**

**Full Stack Java Developer, Pyramid Consulting**

**April 2022 – Present**

I have created functions, programs, and APIs using both Java and Python languages and frameworks. I've also hosted applications using AWS, Cloud Computing, EC2 instance types, elastic block storage and S3, as well as monitor analytics with CloudWatch and CloudTrail. I'm fluent building migration, innovation, and database management using MySQL. I typically use GitHub to control sources and collaborate development with peers. I have built entire full stack applications from the front end, back end, and the database, to hosting it.

**Freelance & Consulting**
**September 2010 – December 2020**
Successfully managed contract employees on various levels, delegated tasks and day to day operations, superseded productivity level while incorporated top notch interpersonal skills with all contractors involved in web development projects. Initiated relationships with vendors, financial institutions, and state offices with assurance, integrity, and dependability. Provided industry specific training and coaching to clients regarding web-based products. Developing key presentations for various team members and clients. Used HTML, CSS, & JavaScript to build spectacular front-end web pages as well as using the antiquated Macromedia Flash platform to build Flash websites. Problem solving with helpful recommendations and practical suggestions from industry leaders. Championed over 50 award winning projects by creating national and international marketing tools for multinational corporations to market their latest products including names like Adidas, Ford, Toyota, Motorola, Wal-Mart, Estee Lauder.

**EDUCATION:**
